DILROOP SINGH

Senior Mobile Application Developer

PROFESSIONAL SUMMARY

Senior Mobile Developer with 10+ years of experience building high-quality, scalable mobile applications using Kotlin, Jetpack Compose, KMM, Flutter and modern architectural patterns. Proven track record delivering cross-platform features, improving performance, contributing to architectural decisions, and supporting apps used by millions. Strong collaborator with expertise in CI/CD, user experience optimization, and clean code practices.

SKILLS

- Kotlin, Jetpack Compose, Kotlin Coroutines, Flow, KMM, SwiftUI (basic)
- MVVM, Clean Architecture, Dependency Injection, Agentic Coding
- GraphQL, Firebase, Mixpanel, REST
- GitHub CI/CD, Jira, Typescript, SAP UI5, Flutter
- UI/UX collaboration, analytics instrumentation, test-driven development

EXPERIENCE

Mobile Developer Lead - OrderMeal LTD - Remote (Contract)

Mar 2026 - Presently

- Lead development of Restaurant and Customer app in Kotlin and Flutter.
- Contributed to technical architecture through ADRs and cross-team discussions.
- Leading Team of 5, mostly senior developers across NZT and IST.
- Led full rewrite of legacy Android app to Jetpack Compose, modernising the UI layer and establishing new architecture patterns adopted across the team.
- Designed and owned the GitHub Actions release pipeline from the ground up, standardising CI/CD workflows across the team and enabling reliable, repeatable releases for multiple white-label client

Senior Mobile Developer – *OCTOPUS ENERGY GROUP – Remote*

APR 2022 – Mar 2026

- Led development of Kotlin Multiplatform Mobile (KMM) features enabling shared business logic across Android and iOS.
- Delivered multiple cross-platform features while ensuring white-label clients remained unaffected through robust CI/CD test pipelines.
- Built Jetpack Compose UI with MVVM, StateFlow, and sealed classes for robust state management.
- Improved maintainability by integrating Hilt and enhancing dependency structure.
- Collaborated asynchronously with UK and India teams to deliver high-impact features.
- Contributed to technical architecture through ADRs and cross-team discussions.
- Provided occasional SwiftUI support for iOS feature parity.

Senior Android Developer – *ANZ – Wellington (Contract)*

SEPT 2021 – MAR 2022

- Sole Android developer responsible for implementing Open Banking data-sharing features in the ANZ goMoney app (1M+ users).
- Enhanced user experience through detailed behavior implementation and UI refinements.
- Integrated Adobe Analytics to capture meaningful usage insights following MVVM patterns.
- Added test mocks using in-house Mockifier library, improving test coverage and reliability.
- Participated in Agile ceremonies and contributed to platform-wide Architectural Decision Records.
- Supported release processes and resolved production issues.

Senior Mobile App Developer – *Foodstuffs South Island Ltd – NZ*

APRIL 2018 – SEPT 2021

- Lead developer and architect for the online order-picking solution used across 70+ New World & PAK'nSAVE stores.
- Maintained Android and Flutter apps, including UI/UX wireframing and analytics integration.
- Built reliable asynchronous operations using Kotlin Coroutines, Dart Futures, and JS Promises.
- Developed internal Maven/Gradle and Dart libraries for shared functionality.
- Built custom Android system launcher for dedicated work devices, deployed via MDM.
- Implemented REST/OData APIs and SAP UI5 features in Typescript and JavaScript.
- Practiced TDD with unit and integration tests using Mockito.

Mobile Application Developer – [*Lab3*](#) (*Christchurch, Part Time*)

OCTOBER 2017 – FEBRUARY 2018

- Learned Django backend development and the Ionic framework while contributing to mobile/web projects

EDUCATION

Diploma in Computing - Level 7 – *Aspire2 International Group*

2017 - 2018, Christchurch, New Zealand

Master Of Technology - Intelligent System – *LP University*

2014 - 2015, Punjab, India

Artificial Intelligence, Machine Learning, Robotics, Image Processing and Neural Network were some of the most fascinating subjects during this degree.

Bachelor Of Technology in Computer Science – *LP University*

2010 - 2014, Punjab, India

Core fundamentals of engineering and computer science were the main focus of this degree. This was the time when I fell in love with android and wrote my first app.

HOBBIES

AI/ComfyUI experimentation, 3D printing, Movies.
